

## **Vigie-Ciel, a participative science project**

Jean-Louis Rault, Brigitte Zanda, Asma Steinhauser, François Colas

Vigie-Ciel, a participative science project The Vigie-Ciel programme of the Musée National d'Histoire Naturelle (Paris, France), associated to the FRIPON programme conducted by the Observatoire de Paris, aims to search and recover meteorites.

The main components of the participatory programme are described in a poster:

- Conferences for the general public
- Training for volunteer trainers spread throughout France
- Dissemination of 25 pedagogic trunks to schools and institutions (planetariums, astronomy clubs, etc)
- Analysis of the jurisprudence concerning the meteorites discoveries
- Support of volunteers for research campaigns on the field- Study of the gathered meteorites and dissemination of the results
